

# Malaria Prevention

Available without prescription  
from your Local Pharmacy

There has been a huge increase in cases of malaria in the UK this year as people go abroad without taking the necessary precautions.

Sometimes it is because the area has developed resistance and the medicines used previously don't work, or it maybe a last minute deal or a hastily arranged business trip.

Whatever the reason is, don't take the chance. Malaria is a serious illness that can stay with you for life.

Our trained pharmacists will advise on up to date, appropriate prevention. They can, where appropriate, provide medication such as Malarone® and doxycycline without contacting your doctor.

**Call in today with your journey plan.**

***Our prices are competitive with the internet.***

***You have the advantage of being able to ask questions in the pharmacy, all week long!***
